The Baby Boom generation has breached the beginning age of retirement at 65. Today, concerns about the financial stability of Social Security, trends in disability, health care costs and the supply of caregivers are all driven by the coming explosion in population over the age of 65. Aging in America focuses on the economic and demographic portrait of the senior population and attempts to answer the following questions:

• What is the socio-economic portrait of the senior population in my community?
• How has this population changed over time?
• Where are the most diverse or most homogenous communities?
• What proportion of the senior population is still working?
• What are their incomes?
• Is there affordable housing in this area for seniors?
• What proportion of seniors provide care for grandchildren?
• What is the incidence of disability by type?

Aging in America will also include comparative data on other age groups to place indicators of aging in context with the broader population.

The Decennial Census and annual American Community Survey form the basis for this aging portrait. These are critical data sources because they are the only sources that provide comparable and comprehensive statistics for all communities across the nation. Many other survey sources exist which add health care and wellness indicators but they do not provide the geographic detail coming from the Census Bureau.

Robert L. Scardamalia is an adjunct professor at the State University of New York at Albany and president of RLS Demographics, Inc. In addition, he has served as president of the Association of Public Data Users. Mr. Scardamalia received his master’s degree in demography from Georgetown University.

Law Librarianship in the Digital Age
Scarecrow Press

The Joseph L. Andrews Legal Literature Award (2014)

"... Well-written and comprehensive in coverage, the book is engaging for both the merely curious and those in need of step-by-step instructions for implementing a change in their library’s services or infrastructure. I highly recommend Law Librarianship in the Digital Age for any law librarian.”
— American Association of Law Libraries

It is absolutely essential that today’s law librarians are digitally literate in addition to possessing an understanding and awareness of recent advancements and trends in information technology as they pertain to the library field. Law Libraries in the Digital Age offers a one-stop, comprehensive guide to achieving both of those goals.

This go-to resource covers the most cutting-edge developments that face today’s modern law libraries, including e-books, mobile device management, Web scale discovery, cloud computing, social software, and much more. These critical issues and concepts are approached from the perspective of tech-savvy library leaders who each discuss how forward-thinking libraries are tackling such traditional library practices as reference, collection development, technical services, and administration in this new “digital age.”

Each chapter explores the key concepts and issues that are currently being discussed at major law library conferences and events today and looks ahead to what’s on the horizon for law libraries in the future. Chapters have been written by the field’s top innovators from all areas of legal librarianship, including academic, government, and private law libraries, who have strived to provide inspiration and guidance to tomorrow’s law library leaders.

Ellyssa Kroski is Director of Information Technology for the New York Law Institute, as well as a librarian, writer, educator, and international speaker.

Considered the nation’s most reliable source for career information, the *Occupational Outlook Handbook* provides important information on a variety of topics including pay, education required, number of jobs, work environment, work schedules, and much more for hundreds of occupations.

The *Handbook*, the federal government’s premier career guidance publication since the 1940’s, is used by millions of people, including counselors, students, jobseekers, employment training specialists, and researchers. It is an excellent first stop to learning about a given career—what it entails, entry requirements, job prospects, and earning potential.

The 2014–2015 edition of the *Handbook* reflects the latest employment projections, developed by the U.S. Bureau of Labor Statistics (BLS) and is packed with many new occupational profiles including:

- Compensation, benefits, and job analysis specialists
- Computer network architects
- Emergency management directors
- Fundraisers
- Genetic counselors
- Information security analysts
- Nurse anesthetists, nurse midwives, and nurse practitioners
- Phlebotomists
- Solar photovoltaic installers
- Training and development specialists
- Web developers
- Wind turbine technicians

In addition, this edition of the *Handbook* contains information from the BLS on the latest employment projections through 2022 including the fastest growing occupations, number of projected new jobs, and a summary of the highest paying occupations in 2012.

This edition also contains a glossary of terms and two valuable appendices:

- Appendix A provides a convenient summary of occupations making it simple to compare jobs.
- Appendix B provides information on the Occupational Information Network (O*NET)

**Occupational Safety and Health Law Handbook**

Third Edition

By Melissa A. Bailey; Eric J. Conn; Frank D. Davis; William K. Doran; Katie A. Duggin; John B. Flood; Lauren Handel; Michael T. Heenan; Margaret S. Lopez; Marshall Lee Miller; John B. O’Loughlin Jr.; Arthur G. Sapper; Rachel Schaffer; Francina M. Segbefia; and Kenneth Seipman

Bernan Press

Now in its third edition, this popular handbook has been your go-to guide to the fundamentals of occupational safety and health law for over a decade. This new edition provides an authoritative and up-to-date reference that you count on for its reliable information and straightforward explanation. Each chapter is written by a highly respected attorney who is an expert in the field. Yet the book is written without legal jargon, in plain English that anyone can understand. In it, the authors provide interpretations of many facets of the Occupational Safety and Health Act, review regulations and standards governing employee protection, and offer advice for dealing with regulatory authorities.

This handbook covers all of the important legal aspects of the Occupational Safety and Health Act with clearly written explanations of such issues as the boundaries of OSHA regulations, general administrative law concepts, and OSHA’s enforcement tactics. It provides “Practitioner’s Tips”—useful legal guidance given by experienced attorneys for complying with OSHA inspection regulations and enforcing employers’ and employees’ rights during inspections. It describes changes to the probable cause test under OSHA’s “Warrant Requirement.” It also explains the legal and practical consequences facing a business not contesting OSHA citations, OSHA’s use of “Monitoring Devices on Employees,” and more. This new edition covers major changes to the Hazard Communication Standard, new enforcement initiatives, updated regulations in the construction industry, new emergency response procedures, and more.

Presidential earmarks? Perhaps even more so than their counterparts in Congress, presidents have the motive and the means to politicize spending for political power. But do they?

*Presidential Pork* explains and interprets presidential efforts to control federal spending and accumulate electoral rewards from that power. Certainly, presidential pork barrel spending does not garner as much attention as projects that members of Congress secure for their constituents. Robert Byrd, for example, was renowned for his prowess at bringing federal dollars to his home state of West Virginia, and political pundits still chuckle about the “Bridge to Nowhere.” But this book clearly illustrates that while Congress claims credit for earmarks and pet projects, the practice is alive and well in the White House, too. More than any representative or senator, presidents engage in pork barrel spending in a comprehensive and systematic way to advance their electoral interests. It will come as no surprise that presidents target the federal largesse toward “swing states,” where the electoral stakes are highest. The White House often influences the enormous federal bureaucracy to spend funds in states that are “in play,” and this capacity cannot be matched by challengers. It is a major advantage that only incumbents enjoy.

*Presidential Pork* re-conceptualizes the way in which we view the U.S. presidency and the goals and behaviors of those who hold the nation’s highest office. It dissects the mechanisms and techniques presidents employ in order to make federal agencies responsive to his or her needs. This book reveals not only what White Houses have done in distributing presidential pork, but also how they go about it. The result is an illuminating and highly original take on presidential power and public policy.

At the global level, there has been an increase in the production and misuse of new psychoactive substances, that is, substances that are not under international control. The manufacture and use of substances that are under international control remain largely stable as compared with 2009, although trends in drug supply and demand have been unequal across regions and countries and across drug types. Member States that are party to the three international drug control Conventions, which were adopted to protect the health and welfare of mankind, remain committed to the drug control system. Evidence shows that while the system may not have eliminated the drug problem, it continues to ensure that it does not escalate to unmanageable proportions.

This year’s *World Drug Report* shows the extent of the problem associated with new psychoactive substances and the deadly impact they can have on their users. The issue of new psychoactive substances is one that the international community will review at the high-level session of the Commission on Narcotic Drugs in 2014. As is the case with traditional drugs, international action against these substances must focus on addressing both supply and demand. The paucity of knowledge on the adverse impacts and risks to public health and safety, coupled with the fact that new psychoactive substances are not under international control, underscores the importance of innovative prevention measures and sharing of good practices between countries. The multitude of new psychoactive substances and the speed with which they have emerged in all regions of the world is one of the most notable trends in drug markets over the past five years. While the existing international control system is equipped to deal with the emergence of new substances that pose a threat to public health, it is currently required to provide a response commensurate with the unprecedented fast evolving nature of the phenomenon of new psychoactive substances. Some countries have adopted innovative approaches to curb the rise of these substances, but the global nature of the problem requires a response based on international cooperation and universal coverage.

FEATURED TITLES

**Freedom of Expression and the Internet**
Council of Europe

With the rise of the Internet, the opportunities to express oneself have grown exponentially, as have the challenges to freedom of expression. From the Arab Spring to the global Occupy movement, freedom of expression on the Internet has had a profound impact on the debates which shape our future. At the same time, an increasing number of states use the Internet to spy on journalists and citizens, to prosecute and jail bloggers, and to censor online information.

This book sets out to answer essential questions regarding the extent and limits of freedom of expression online. It seeks to shed light on the often obscure landscape of what we are allowed to say online and how our ideas, and the process of imparting and receiving information, are protected.

It shows the large ambit of rights protected by freedom of expression – including freedom of the media and the right to access information via the Internet. It also highlights the importance of the standard-setting, monitoring and promotion activities of international and non-governmental organizations, with a chapter on relevant national practices that illustrates how different states deal with the challenge that the Internet has brought to ensuring freedom of expression for all. As the importance of the Internet in our daily lives grows, readers will find this book to be a valuable resource for understanding the rights and obligations of each actor on the Internet, including states, Internet companies and civil society.

**World Trends in Freedom of Expression and Media Development**
United Nations Education, Scientific and Cultural Organization

This publication offers a groundbreaking look at recent evolutions in media freedom, independence, pluralism and journalist safety. These areas are explored in depth in each region and with respect to gender and global media. The overarching trend observed throughout the study is one of disruption brought on by technology and to a lesser extent the global economic crisis, with mixed results for freedom of expression and media development.

*World Trends in Freedom of Expression and Media Development* is a key resource for governments, the media, academia, the private sector and civil society, and is an essential read for anyone interested in the contemporary media environment.

**World Migration Report 2013**

Migrant Well-being and Development

International Organization for Migration

The *World Migration Report 2013* contributes to the global debate on migration and development in three ways: First, the focus of the report is on the migrant, and on how migration affects a person’s well-being. Many reports on migration and development focus on the impact of remittances: the money that migrants send back home. This report takes a different approach, exploring how migration affects a person’s quality of life and their human development across a broad range of dimensions. Second, the report draws upon the findings of a unique source of data – the Gallup World Poll surveys, conducted in more than 150 countries, to assess the well-being of migrants worldwide for the first time. Third, the report sheds new light on how migrants rate their lives, whether they live in a high-income country in the North, or a low or middle income country in the South. Traditionally the focus has been on those migrating from lower income countries to more affluent ones; this report considers movements in all four migration pathways and their implications for development, i.e., migration from the South to North, between countries of the South or between countries of the North, as well as movements from the North to the South.

The first three chapters of this *Report* provide an introduction to the chosen theme ‘Migrant Well-being and Development’, present the current global migration situation across four migration pathways, and review existing research on the emerging field of happiness and subjective well-being.

Chapter four presents original findings on migrant well-being from the Gallup World Poll, looking at outcomes on six core dimensions of well-being across the four migration pathways.

The final part draws conclusions and makes recommendations for future initiatives to monitor migrant well-being and the impact of migration on development, with reference to the inclusion of migration in the post-2015 global development framework.

**Beyond Macroeconomic Stability**

Structural Transformation and Inclusive Development

International Labour Organization

This thought-provoking volume goes beyond the narrow conceptualization of macroeconomic stability to explore the link between structural transformation and inclusive development. It examines three thematic pillars: the limits of conventional macroeconomics; the long-run agenda of structural transformation and the development of capabilities; and inequality and its macroeconomic consequences.

Using an empirical approach to track the various sources of structural transformation, the book builds on the thesis that investment in infrastructure leads to the inculcation of capabilities, broadly defined to include knowledge accumulation, dissemination and application. The volume examines secular trends in the functional distribution of income and explores their possible macroeconomic consequences by developing a two-country macroeconomic model for open economies. It also reinterprets social protection from the perspective of inclusive development and structural transformation. Further, through a combination of country-specific and global evidence as well as macroeconomic modeling and literature surveys, it seeks to answer the question of whether growing inequality in many countries combined with stagnant real incomes was one of the sources of the recent global crisis.

This book offers an essential new resource to economists, labor specialists, policy-makers, teachers, students and all those interested in the economics and theories of development.

The Political and Economic History of China 1949-1976

Three-Volume Set

Enrich Professional Publishing

This is a must-read book to the study of China’s modern history from 1949-1976, covering the Cultural Revolution, the Great Leap Forward, and the Golden Age of Industrialization. It presents the context for the following 30 years of reforms in China, as well as President Xi’s latest series of reforms. The historical incidents covered in this series are the ones which continue to influence the ideological and policy developments of China today and they will shape its future. Professor Hu Angang, prominent Tsinghua University economics professor and the leading New Leftist academic, offers his compelling insights into these decades of chaos and political turbulence in China.

Content Highlights

• Volume 1 The Early Stage of People’s Republic of China (1949-1956)
• Volume 2 From Great Leap Forward (1957-1965)
• Volume 3 The Cultural Revolution (1966-1976)

Hu Angang is a Professor in the School of Public Policy & Management at Tsinghua University, Director of the Center for China Study at Tsinghua-CAS (Chinese Academy of Sciences), a Visiting Professor at Harvard University and Japan’s Keio University, and was a Guest Professor at Tongji University in Shanghai, China. He is one of the leaders in the field of China Studies, and has published 40 books and nearly 200 articles in the core periodicals and key academic magazines in China.

China’s Economy in Transition

From External to Domestic Rebalancing

International Monetary Fund

China’s current account surplus has declined to around one-quarter the peak reached before the global financial crisis. While this is a major reduction in China’s external imbalance, it has not been accompanied by a decisive shift toward consumption-based growth. Instead, the compression in its external surplus has been accomplished through increasing fixed investment so that it is now an even higher share of China’s national economy. This increasing reliance on fixed investment as the main driver of China’s growth raises questions about the durability of the compression in the external surplus and the sustainability of the current growth model that has had unprecedented success in lifting about 500 million people out of poverty over the last three decades. This volume examines various aspects of the rebalancing process underway in China, highlighting policy lessons for achieving stable, sustainable, and inclusive growth.

Many jurisdictions around the world are trying to retain or increase the share of cycling in urban traffic in order to benefit from the many health and transport efficiency benefits. Safety is a key concern and should be accounted for in these policies.

This report of the International Transport Forum’s Cycling Safety Working Group monitors international trends in cycling, safety and policy, and explores options that may help decision makers design safe environments for cycling. Key messages relate to strategic goal-setting for cycling policy and managing crash risks while increasing health benefits. The report also discusses how to better capture crash and bicycle usage statistics. The safety impacts of a wide range of pro-cycling measures are examined in detail.

Table of contents:

Cycling safety: key messages and recommendations

1. Cycling, safety, health and policy – necessary linkages, suggested approaches
2. Policy measures and administrative framework for bicycle safety
3. Analysis of international trends in bicycle use and cyclist safety
4. Overview of bicycle crash characteristics in selected countries
5. Review of Bicycle safety measures

Annex A: Working group questionnaire on bicycle safety and crash characteristics

Annex B: Policy measures derived from stated preference analysis for bicycle use: Route choice factors in the Indian context

Annex C: A stated preference analysis on bicycle user’s perception on cycling safety and its policy implications in Korean contexts

ITF-OECD Working Group on Cycling Safety

Learning from Megadisasters

Lessons from the Great East Japan Earthquake

The Great East Japan Earthquake (GEJE) was the first disaster ever recorded that included an earthquake, a tsunami, a nuclear power plant accident, a power supply failure, and a large-scale disruption of supply chains. This volume is part of a larger knowledge-sharing project sponsored by the World Bank and the government of Japan that collects and analyzes information, data, and evaluations performed by academic and research institutions, nongovernmental organizations, government agencies, and the private sector—all with the objective of sharing Japan’s knowledge on disaster risk management (DRM) and postdisaster reconstruction with countries vulnerable to disasters so they can mainstream DRM in their development policies and planning. Other countries can protect themselves from major disasters by adopting—and adapting as necessary—some of the measures taken by Japan, and by understanding the strengths and weaknesses of Japan’s response to the GEJE.

Breathing apparatus (BA) is used in atmospheres that are hazardous to health. Often the work will be complex, physically and psychologically demanding and, in some circumstances, normal sensory perceptions will be denied. This guidance will provide support for the fire and rescue services in the resolution of incidents involving breathing apparatus. This supersedes Technical Bulletin 1/1997 Breathing Apparatus Command and Control Procedures and the consolidated.

Fire and rescue service personnel operate in a dynamic and sometimes hazardous environment. The activities covered include incidents involving fire, water, height, road traffic collisions, chemicals, biological hazards, radiation and acts of terrorism. Operational guidance provides a consistency of approach and forms the basis for common operational practices.

Chapters cover: strategic role of operational guidance; risk assessment; key principles; fire and rescue service operations - pre-planning considerations; operational procedures: BA entry control, air management, communications, telemetry, search and rescue within structure, BA guidelines, BA ancillary equipment and additional procedures, welfare of BA wearers, emergency arrangements, interoperability, national resilience. Supporting information is provided with references, the legal framework, a list of abbreviations, a glossary of terms and five appendices.

**Fundamentals of Fire Protection for the Safety Professional**
Second Edition
Bernan Press

*Fundamentals of Fire Protection for the Safety Professional* provides safety managers with a guide for incorporating fire hazard awareness and protection into their safety management plans.

Industrial fires pose one of the greatest threats to organizations in terms of financial, human, and property losses. Understanding fire safety basics, the physics of fire, and the properties and classes of common hazards is key to designing fire safety management programs that not only protect an organization’s assets but also ensure the safe evacuation of all involved.

*Fundamentals of Fire Protection for the Safety Professional* takes an in-depth look at fire hazards in the workplace—from the substances required to do business to the building construction itself—and provides practical fire safety principles that can be applied in any work environment. Readers will learn how to develop emergency action plans and fire prevention plans, implement effective alarm and detection systems and fire extinguishment systems, and develop a comprehensive fire program management plan that is in compliance with Federal Emergency Management Agency, Occupational Safety and Health Administration, Environmental Protection Agency, and National Fire Protection Association standards.

Each chapter includes a chapter summary and sample problems, making this an ideal training tool in the workplace or the classroom. Answers to chapter questions and a comprehensive glossary and index are provided at the end of the book.

Lon Ferguson, CSP, and Christopher Janicak, CSP, ARM, are Professors of Safety Sciences at Indiana University of Pennsylvania. Dr. Ferguson, chairman of the university’s safety department, has worked with PA/OSHA as a compliance consultant and with Liberty Mutual as a fire safety specialist. Dr. Janicak, who teaches fire safety at the university, has worked in the loss control field serving both government and private sector clients.

EMERGING ISSUES IN FINANCIAL DEVELOPMENT
LESSONS FROM LATIN AMERICA
The World Bank

Emerging Issues in Financial Development compares the financial sector stance in Latin America with that in other developing and developed countries in order to shed light on the key obstacles for financial development. The book focuses on the main architectural issues, overall perspectives, and interconnections. Its value thus hinges on its holistic view of the development process, its broad coverage of the financial services industry (not just banking), its emphasis on comparisons and benchmarking, its systemic perspective, and its effort to incorporate lessons from financial crises.

EXTERNAL DEBT STATISTICS
GUIDE FOR COMPILERS AND USERS
International Monetary Fund

External Debt Statistics: Guide for Compilers and Users provides clear guidance on the concepts, definitions, and classifications of gross external debt of the public and private sectors; the sources and techniques for compiling these data; and the analytical use of these data. The Guide also presents the tables that are relevant for the external debt category of the IMF’s data dissemination standards. The Guide also explains the concept of net external debt—that is, a comparison of the external debt position with holdings of foreign financial assets in the form of debt instruments—and incorporates financial derivative positions into external debt analysis.

GLOBAL FINANCIAL DEVELOPMENT
REPORT 2014
FINANCIAL INCLUSION
The World Bank

Financial inclusion has become a major subject of interest among policymakers, researchers, and other financial sector stakeholders. Many countries, for example, have recently adopted explicit financial inclusion strategies with targets for financial inclusion. The interest reflects an increased recognition that financial inclusion can be a driver of economic growth and poverty alleviation, and that many individuals and firms are excluded unnecessarily from even basic financial services. About half of the world’s adult population—more than 2.5 billion people—have no bank account is one powerful example. Barriers such as cost, travel distance, and amount of paperwork and requirements play an important role. Many of these barriers can be addressed by better policies.

FINANCIAL CRISSES
CAUSES, CONSEQUENCES, AND POLICY RESPONSES
International Monetary Fund

Financial Crises: Causes, Consequences, and Policy Responses provide a comprehensive overview of research into financial crises and policy lessons learned. The book covers a wide range of crises, including banking, balance of payments, and sovereign debt crises. It begins with an overview of the various types of crises and introduces a comprehensive database of crises. Broad lessons on crisis prevention and management, as well as the short-term economic effects of crises, recessions, and recoveries are discussed. The medium-term effects of financial crises on economic growth, as well as policy measures to prevent booms, mitigate busts, and avoid crises are analyzed. Finally, policy measures for mitigating the adverse impact of crises and ways to restructure banks, households, and sovereigns are presented. The collection of research in this book provides an excellent overview of critical policy areas, with valuable lessons on how countries can better monitor their economies and financial systems.

THE GLOBAL DEBT CRISIS
HAUNTING U.S. AND EUROPEAN FEDERALISM
Brookings Institution Press

In an age of fiscal uncertainty, The Global Debt Crisis reveals why the field of political economy has come back in vogue after decades in which political decisions were often divorced from economic policy. A cast of experts from both sides of the Atlantic breaks down federal structural flaws that have led to economic and political turmoil. Additionally, the authors suggest new ways to instill fiscal discipline by finding unconventional and interventionist techniques to initiate accountable governance, which pays homage to the constant interplay of political and economic policy.

GLOBAL FINANCIAL STABILITY REPORT
MOVING FROM LIQUIDITY - TO GROWTH-DRIVEN MARKETS
International Monetary Fund

The Global Financial Stability Report (GFSR) provides expert and up-to-date analysis of global capital flows that play a critical role in world economic growth and financial stability. The report focuses on current conditions in global financial markets, analyzing financial imbalances and structural issues that could pose risks to stability and sustained market access by emerging market borrowers. Along with the IMF's semiannual World Economic Outlook, the GFSR is a key vehicle for communicating the IMF's multilateral surveillance. The GFSR also draws out the financial ramifications of economic imbalances highlighted by the WEO, making it an indispensable companion publication.

GOVERNMENT FINANCE STATISTICS YEARBOOK 2013
International Monetary Fund

Government Finance Statistics Yearbook presents detailed financial data for central, state, and local governments of countries across the globe. Data tables are presented in three types: world, country, and international.

World tables allow users to examine the structure and relative magnitude of government operation. Country tables furnish data on central government revenue, grants, expenditure, lending minus repayments, financing, and debt, while the international tables list major units of general government and contain notes on data coverage for country tables.

NEW!

United Nations

Africa’s growth plummeted during its ‘lost decades’ of the 1980s and 1990s while unemployment soared, and production and export bases became more concentrated. Africa boasts significant human and natural resources that can be used to promote industrialization and structural economic transformation through value-addition strategies in all sectors. This publication examines key constraints and opportunities for African countries to make the most of their commodities by adding value through linkage development. It also addresses how African countries can design and implement policies to promote value addition and economic transformation, and reduce their dependence on producing and exporting unprocessed commodities.

**Economic Survey of Latin America and the Caribbean 2013 Three Decades of Uneven and Unstable Growth**
United Nations

The Economic Survey of Latin America and the Caribbean 2013 analyzes the policies required to improve the perspectives of sustainable regional growth. It reviews the links between economic growth, investment and employment, as well as the fiscal and monetary policies, industrial, trade and social policies relevant for short and long-term growth. Special attention is given to regional key issues such as its structural heterogeneity, its high levels of inequality and the challenges of environmental sustainability. Additionally, the region’s economic evolution during the first semester of 2013 is analyzed in this survey.

**IACCM Fundamentals of Contract and Commercial Management**
Van Haren Publishing

This ground-breaking title delivers a lively and practical complete insight into the contracting process which is useful in both business and personal life. In this book you’ll find sensible guidance and approaches to ensure business success. Case studies showing you what can go wrong – and what can go right – bring theory into the real world.

Designed for the non-contract business professional, this book takes project managers and other professionals through the basic process and gives them a road map to improved results, increased value, and successful outcomes.

September 2013 • 286 pages
9789087537128 • $48.00 • Paperback
Latin American economies continue to present relatively stable growth but continued uncertainty with regards to the duration of the commodity boom could pose threats to medium-term growth and economic development. Latin American countries face increasing competition from emerging economies across the globe, particularly in manufacturing sectors. In this context of shifting wealth, it is increasingly important to foster competitiveness and connectivity.

Improving logistics performance is particularly important as it directly impacts growth, productivity, and trade within the region and beyond. The region's productive structure with significant concentration in natural resource and agriculture augments the importance of logistics in fostering competitiveness. Nevertheless, logistics performance in the region faces serious gaps, particularly in the areas of customs performance and the availability of infrastructure. Improving these aspects will entail more and better investment in infrastructure, as well as making the most of existing infrastructure by putting in place efficient trade facilitation measures and efficient and appropriate regulatory frameworks.

What you will find in the print edition:

- A selection of the most popular indicators across 155 economies and 14 country groups organized into six WDI themes
- Thematic and regional highlights, providing an overview of global development trends
- An in-depth review of the progress made toward achieving the Millennium Development Goals
- A user guide describing resources available on-line and on mobile apps

April 2014 • 144 pages
9781464801631 • $25.00 • Paperback

What you will find in the print edition:

- Patterns of economic change by state and area
- Income, employment, and gross domestic product

This is a special edition of Business Statistics of the United States. It presents data on personal income, employment, and gross domestic product for the United States as a whole, and by region, state, and metropolitan statistical area.

This book contributes historical time-series measurements of key aggregates that show how the economies of regions, states, and metropolitan areas have responded over time to cyclical currents and long-term trends. Statistics at the state level provide a framework for analyzing current economic conditions in each state and can serve as a basis for decision making.

World Economic Situation and Prospects 2014

The world economy continues its slow recovery from the global financial crisis, but the main impetus for growth now lies with the advanced economies. The April 2014 World Economic Outlook examines the causes and implications of recent trends, including increased financial volatility in emerging market economies, lower-than-expected inflation in advanced economies, and the withdrawal of monetary accommodation. It examines the policy priorities for both advanced economies and emerging market developing economies. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and another chapter that examines factors behind the fluctuations in emerging market economies’ growth, including the role of China.

9781484308349 • $68.00 • Paperback
More than three decades after the identification of the virus, HIV continues to affect millions of people worldwide. Much progress has been made and infection rates are down in a number of countries. From the beginning the education sector has played a central role in responding to HIV, though its role and the contribution of school-based HIV education has been the subject of much debate.

This book explores the major debates and provides an overview of how the role of the education sector and approaches to HIV education have evolved, what has been learned, emerging challenges and opportunities, and proposes a way forward for the education sector to contribute to the prevention of new infections, treatment and care, and reduce stigma and discrimination.

The Report also documents global progress in achieving Education for All goals and provides lessons for setting a new education agenda post-2015. In addition, the Report identifies that insufficient financing is hindering advances in education.

The Digest’s purpose is to provide a compilation of statistical information covering the broad field of education from pre-kindergarten through graduate school. The Digest contains data on a variety of topics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, and federal funds for education, libraries, and international comparisons.

Statistical information on the whole range of American education is presented in this volume.

In the 2013 edition, new material includes:

- More recent data on the economic crisis, showing that education remains the best protection against unemployment;
- More detailed data on program orientation (general versus vocational) in secondary and tertiary education;
- An analysis of how work status (full-time, part-time, involuntary part-time) is related to individuals’ level of education, and much more.

The importance of financial literacy and specifically the need to promote financial education has been recognized as an important contributor to improved financial inclusion and individuals’ financial well-being as well as a support to financial stability.

The publication addresses the challenges linked to the introduction of financial education in schools, and provides practical guidance and case studies to assist policy makers, and a comparative analysis of existing learning frameworks for financial education in the formal school system.
This book shows that teacher quality is crucial for economic development, and presents a first-ever picture of how LAC's teachers perform inside the classroom, drawing on new research in over 14,000 classrooms in seven countries. It presents the latest evidence on the three core strategies for raising teacher quality: attracting high-talent students into teaching careers, developing their skills effectively, and using incentives to motivate high performance.

The Holocaust has become a global reference point for remembering the Holocaust and raising awareness about human right abuses and state violence. How do educators handle this excessively complex and emotionally loaded subject in fast-changing multicultural societies? What is the significance of education about the Holocaust in areas of the world that have no connection whatsoever with the history of the Jewish people and Nazi crimes? Are internationally relevant educational practices emerging as learning and teaching about the Holocaust is expanding?

This publication gathers the contributions of major historians and educators from all over the world and frames current debates in the field of Holocaust education and remembrance, bringing to light the reasons why it is so vital that we keep teaching the history of the Holocaust in today’s world, regardless of where we live.

This report compares the performance of 15-year-olds in the United States in PISA against the global patterns and trends. But it goes beyond the aggregate level analysis that have so far been published in the PISA 2012 reports, to give analysis of student performance on individual mathematics test items in order to reveal students’ strengths and weaknesses. Considering this also in the context of the relationship between PISA and the Common Core Standards for Mathematics can help connect these results to what the United States aspires to teach in classrooms and help inform teaching practices that can support performance improvement.

Back to Work: Growing with Jobs in Europe and Central Asia

The World Bank

Back to Work: Growing with Jobs in Europe and Central Asia asserts that to get more people back to work and to grow with jobs, countries, especially late reformers, need to regain the momentum for economic and institutional reforms that existed before the economic crisis. They should lay the fundamentals to create jobs for all workers, by pushing reforms to create the enabling environment for existing firms to grow, become more productive, or exit the market and let new firms emerge and succeed (or fail fast and cheap). They should also implement policies to support workers so that those workers are prepared to take on the new jobs being created, by having the right skills and incentives, unhindered access to work, and being ready to relocate.

Employment, Hours, and Earnings 2013

States and Areas
Eighth Edition

Bernan Press

This eighth edition of Employment, Hours, and Earnings brings together a wealth of employment data compiled by the Bureau of Labor Statistics and provides estimates on employment, hours, and earnings for each state and employment data for the nation’s 75 largest metropolitan areas. Detailed industry data is presented on a monthly and annual basis giving the user a variety of tools for analysis.

Features of this edition include:

- New: Mass Layoff Events, by state, 2001 through 2012
- Nearly 300 tables with data on employment for each state, the District of Columbia, and the nation’s 75 largest MSAs
- An introduction for each state and the District of Columbia that summarizes salient data and noteworthy trends, including changes in population and the civilian labor force, industry increases and declines, employment and unemployment rates, and charts detailing employment percentages, by industry.

Greener Skills and Jobs

Organisation for Economic Co-operation and Development

Green skills, that is, skills needed in a low-carbon economy, will be required in all sectors and at all levels in the workforce as emerging economic activities create new (or renewed) occupations. Structural changes will realign sectors that are likely to decline as a result of the greening of the economy and workers will need to be retrained accordingly. The successful transition to a low-carbon economy will only be possible if workers can flexibly adapt and transfer from areas of decreasing employment to new industries. This paper suggests that the role of skills and education and training policies should be an important component of the ecological transformation process.

THE INFORMAL ECONOMY AND DECENT WORK
A POLICY RESOURCE GUIDE SUPPORTING TRANSITIONS TO FORMALITY
International Labour Organization

Informal employment is a key challenge in today's globalized economies, not only from the perspective of millions of women and men who earn their livelihoods working and producing under informal arrangements, but also for policy-makers striving to find the right policy responses. Typically, those in the informal economy earn little and have low productivity, in spite of working long hours. Exposed to inadequate and unsafe working conditions, they also have limited access to social protection and weak coverage under the law, and are often not unionized.

JOBS AND GROWTH SUPPORTING THE EUROPEAN RECOVERY
International Monetary Fund

Five years after the onset of the global financial crisis, Europe's economy is still fragile. Notwithstanding recent positive signs amidst calmer financial markets, medium-term growth is likely to remain frail owing to continuing weaknesses and vulnerabilities at the country level and in the fabric of European institutions and banks, especially in the euro area. In addition, unemployment in many countries has reached very high levels. The IMF research collected in this volume provides a number of guideposts that offer an opportunity for stronger and better-balanced growth and employment in Europe after what has been a long and dismal period of crisis.

RACE AND EMPLOYMENT IN AMERICA 2013
Bernan Press

This Bernan Press first edition contains comprehensive information from the Census Bureau’s Equal Employment Opportunity (EEO) tabulation. Based on the American Community Survey, the EEO tabulation highlights the diversity of the labor force and serves as the primary external benchmark for comparing the race, ethnicity, and sex composition of an organization’s internal workforce, and the analogous external labor market, within a specified geography and job category. Race and Employment in America answers questions about the direction of the workforce in America by race and the professions that America’s races are choosing. Occupations are displayed by individual states and metropolitan areas. This edition includes a complete listing of detailed occupation data for the nation, by race and Hispanic origin, and listings of job categories by race and Hispanic origin for all states and metropolitan areas.

TOWARDS THE SINGLE EMPLOYMENT CONTRACT
COMPARATIVE REFLECTIONS
International Labour Organization

This book examines the concept of the single employment contract in a comparative perspective, presenting its pros and cons, highlighting its virtues and revealing its inherent contradictions.

The authors set out the general framework within which the current debate has developed by outlining the origins that gave rise to the proposal of a single employment contract. They then review the debate on labor market segmentation and the flexicurity proposal and examine the key characteristics of the single employment contract as well as the arguments put forward both for and against it. Case studies show how the idea has been taken up in France, Italy and Spain.

YOUTH EMPLOYMENT IN SUB-SAHARAN AFRICA
The World Bank

Youth Employment in Sub-Saharan Africa notes that many youth employment challenges are problems of employment in general. However, youth is a time of transition, and young people face particular constraints to accessing productive work. The report brings together original analysis of household and labor force surveys; it reviews the experience of a number of promising interventions across the continent; it draws from qualitative studies in several countries; and it surveys the most up-to-date evidence from rigorous evaluations of policies and programs. From this information base, the report provides guidance to policy makers on how to intervene along two dimensions—human capital and the business environment—and in three priority areas—agriculture, household enterprises, and the modern wage sector. The ultimate goals are to increase productivity, improve livelihoods, and multiply opportunities for young people.

Order at www.bernan.com
Energy efficiency has been referred to as a “hidden fuel”, one that extends energy supplies, increases energy security, lowers carbon emissions and generally supports sustainable economic growth. Yet it is hiding in plain sight: in 2011, investments in the energy efficiency market globally were at a similar scale to those in renewable energy or fossil-fuel power generation.

The Energy Efficiency Market Report provides a practical basis for understanding energy efficiency market activities, a review of the methodological and practical challenges associated with measuring the market and its components, and statistical analysis of energy efficiency and its impact on energy demand. It also highlights a specific technology sector in which there is significant energy efficiency market activity, in this instance appliances and ICT. The report presents a selection of country case studies that illustrate current energy efficiency markets in specific sectors, and how they may evolve in the medium term.

Establishing a National Nuclear Security Support Centre
International Atomic Energy Agency

In recent years, requests for IAEA support in human resource development and for technical and scientific support in nuclear security have significantly increased. As a result, the IAEA has identified the need to develop a concept that seeks to effectively pass ownership of nuclear security knowledge and associated technical skills to states through the establishment of nuclear security support centres (NSSC). This publication provides an overview of the functions and the structure of a NSSC and provides guidance on implementing the suggested NSSC concept. It outlines the developmental, organization and financial framework that should be considered in conjunction with the decision to establish a NSSC and highlights the importance of implementing national commitments stemming from adherence to international instruments for nuclear security. The publication is primarily addressed to senior decision makers responsible for nuclear security functions at the various competent authorities in a state.

**Renewable Energy in China**

*Towards a Green Economy Three-Volume Set*

*Enrich Professional Publishing*

Renewable Energy in China: Towards a Green Economy presents a complete look at China's efforts to become a “green” nation. This three-volume series uses an overview of contemporary issues of sustainable development, as well as a set of 25 case studies (from leading companies and industry experts in China and the West), to highlight China's unique “green” role. The key concepts of sustainable development, including the rising use of solar and wind power, present complex challenges for China and shape the nation’s geopolitical role. With a preface from renowned statesman Cheng Siwei and an introduction from Nobel Peace Prize winner Mohan Munasinghe, Renewable Energy in China: Towards a Green Economy offers an authoritative review of all aspects of China’s progress as a green economy including the nation’s current efforts to promote a culture of sustainable development.

**Water and Energy**

*United Nations Education, Scientific and Cultural Organization*

Water and energy are closely interconnected and highly interdependent. Trade-offs need to be managed to limit negative impacts and foster opportunities for synergy. Water and energy have crucial impacts on poverty alleviation both directly, as a number of the Millennium Development Goals depend on major improvements in access to water, sanitation, power and energy sources, and indirectly, as water and energy can be binding constraints on economic growth – the ultimate hope for widespread poverty reduction.

This fifth edition of the United Nations World Water Development Report seeks to inform decision-makers (inside and outside the water and energy domains), stakeholders and practitioners about the inter-linkages, potential synergies and tradeoffs, and to highlight the need for appropriate responses and regulatory frameworks that account for both water and energy priorities.

United Nations World Water Development Report #5

March 2014 • 208 pages

**World Energy Outlook 2013**

*Organisation for Economic Co-operation and Development*

A new global energy landscape is emerging, resetting long-held expectations for our energy future. Incorporating these recent developments and world-class analysis, World Energy Outlook 2013 presents a full update of energy projections through to 2035 and insights into what they mean for energy security, climate change, economic development and universal access to modern energy services. Oil, coal, natural gas, renewables and nuclear power are all covered, along with an update on developments in subsidies to fossil fuels and renewable energy.

This year World Energy Outlook also gives a special focus to topical energy sector issues:

- Redrawing the energy-climate map: the short-term measures that could keep the 2°C target within reach, and the extent to which low-carbon development could leave fossil-fuel investments stranded. Special report to be released 10 June.
- Energy in Brazil: how a vast and diverse resource base – from renewables to new offshore discoveries – can meet the growing needs of the Brazilian economy and open up new export markets.
- Oil supply, demand and trade: a fresh look at the economics and decline rates of different types of oil production around the world, the prospects for light tight oil inside and outside North America, along with new analysis of oil products and the refining sector.
- The implications for economic competitiveness of the changing energy map: what the major disparities in regional energy prices might mean for major energy-intensive industries and the broader impact on economic growth and household purchasing power.
- The global spread of unconventional gas supply, including the uptake of the IEA “Golden Rules” to address public concerns about the associated environmental and social impacts.
- Energy trends in Southeast Asia, a region that is exerting a growing influence in the global energy system. Special report to be released 23 September.

**BIODIVERSITY AND ENVIRONMENTAL CHANGE**
**MONITORING, CHALLENGES AND DIRECTION**
CSIRO Publishing

This data-rich book demonstrates the value of existing national long-term ecological research in Australia for monitoring environmental change and biodiversity.

This book highlights some of the temporal changes in the environment and/or in biodiversity that have occurred in different ecosystems, ranging from tropical rainforests, wet eucalypt forests and alpine regions through to rangelands and deserts. Many important trends and changes are documented and they often provide new insights that were previously poorly understood or unknown. These data are precisely the kinds of data so desperately needed to better quantify the temporal trajectories in the environment and biodiversity in Australia.

MEASURING VULNERABILITY TO NATURAL HAZARDS
TOWARDS DISASTER RESILIENT SOCIETIES, SECOND EDITION
United Nations
This newly updated edition includes the dimension of adaptation to climate change and new risks resulting from climate change. The text provides and combines practical examples from Africa, Asia, the Americas and Europe with theoretical and conceptual frameworks. It is key reading for all those interested in improving risk reduction and adaptation strategies to extreme events and gradual changes in the context of climate change and natural hazards. Measuring vulnerability and evaluating adaptation are essential prerequisites to strengthening the capacities of communities in building resilience through knowledge-based approaches.

STATE OF THE WORLD’S FORESTS 2014
ENHANCING THE SOCIOECONOMIC BENEFITS FROM FORESTS
Food and Agriculture Organization
This edition of FAO’s State of the World’s Forests addresses this knowledge gap by systematically gathering and analyzing available data on forests’ contributions to people’s livelihoods, food, health, shelter and energy needs. Crucially, the report also suggests how information might be improved and policies adjusted, so that the socioeconomic benefits from forests can be enhanced in the future.

WATER AND CLIMATE CHANGE ADAPTATION POLICIES TO NAVIGATE UNCHARTED WATERS
Organisation for Economic Co-operation and Development
This report sets out the challenge for freshwater in a changing climate and provides policy guidance on how to navigate this new “waterscape”. It highlights the range of expected changes in the water cycle and the challenge of making practical, on-site adaptation decisions for water. It offers policymakers a risk-based approach to better “know”, “target” and “manage” water risks and proposes policy guidelines to prioritize action and improve the efficiency, timeliness and equity of adaptation responses.

The report also highlights general trends and good practices drawn from the OECD Survey of Policies on Water and Climate Change Adaptation, covering all 34 member countries and the European Commission.

WEATHER AND CLIMATE RESILIENCE
EFFECTIVE PREPAREDNESS THROUGH NATIONAL METEOROLOGICAL AND HYDROLOGICAL SERVICES
The World Bank
The importance of weather, climate, and water information is rising because of the need to serve more elaborate societal needs, minimize growing economic losses, and help countries adapt to climate change. Weather, climate and water impacts societies and economies through extreme events that effect demand for electricity and production capacity, planting and harvesting dates, managing construction, transportation networks and inventories, and human health.

The National Meteorological and Hydrological Services (NMHSs) are the government’s authoritative source of weather, climate, and water information, providing timely input to emergency managers, national and local administrations, the public, and critical economic sectors. This book underscores the urgent need to strengthen NMHSs, especially in developing countries, and provides cost-benefit estimates of the return that countries can hope to achieve.

The specification monographs provide information on the identity and purity of food additives used directly in foods or in food production. The main three objectives of these specifications are to identify the food additive that has been subjected to testing for safety, to ensure that the additives are of the quality required for use in food or in processing and to reflect and encourage good manufacturing practice. This publication and other documents produced by JECFA contain information that is useful to all those who work with or are interested in food additives and their safe use in food.

This report is based on extensive research, including document reviews and country level surveys, on policy decisions made by governments during the period 2007-2012. A broad range of food security and agricultural development policy decisions implemented in 71 developing countries of Africa (27), Asia (24) and Latin America and the Caribbean, LAC, (20) was reviewed. The countries covered represent 81, 90 and 98 percent of the total population in Africa, Asia and LAC, respectively. The review has focused on policy trends, common practices and emerging issues. Policies are increasingly designed to influence domestic food availability and access.

Trade and Environment Review 2013 Wake up before it is too late - Make Agriculture truly Sustainable now for Food Security in a Changing Climate United Nations The 2013 report warns that continuing rural poverty, persistent hunger around the world, growing populations, and mounting environmental concerns must be treated as a collective crisis. Urgent and far-reaching action is needed before climate change begins to cause major disruptions to agriculture, especially in developing countries. The report cites a number of trends that collectively suggest a mounting crisis, including increasing food prices, increased fertilizer use, and a decline in the agriculture growth rate. But most important of all are the persistent problems with hunger, malnutrition, and access to food. Almost 1 billion people currently suffer from hunger, and another 1 billion are malnourished, even though current global agricultural production already provides sufficient calories to feed a population of 12 to 14 billion.

OECD FACTBOOK 2014
Organisation for Economic Co-operation and Development

OECD Factbook 2013 is a comprehensive annual statistical publication. More than 100 indicators cover a wide range of topics including new indicators on trade in value added and climate change. Data are provided for all OECD member countries (including area totals), and for Brazil, China, India, Indonesia, the Russian Federation and South Africa.

For each indicator, there is a two-page spread: a text page includes a short introduction followed by a detailed definition of the indicator, comments on comparability of the data, an assessment of long-term trends related to the indicator and a list of references for further information on the indicator; the second page contains a table and a graph providing, at a glance, the key message conveyed by the data. Each indicator includes “StatLinks” which allow readers to download the corresponding data.

THE WHO, WHAT, AND WHERE OF AMERICA
FOURTH EDITION
Bernan Press

This fourth edition of The Who, What, and Where of America uses the 2010–2012 American Community Survey (ACS) data to present a concise resource of information that tells a story about America—its population, levels of education, types of employment and housing, and patterns of migration and transportation in one, convenient volume.

The Who, What, and Where of America pulls details from the ACS that identify America at a certain point in time. Each part is preceded by highlights and ranking tables that show how areas diverge from the national norm. These research aids are invaluable for understanding data from the ACS and for highlighting what it tells us about who we are, what we do, and where we live.

In this issue you will find social and economic estimates on the ways American Communities are changing with regard to the following:

- Age and race
- Health care coverage
- Marital history
- Education attainment
- Income and occupation
- Commute time to work
- Employment status
- Home values and monthly costs
- Veteran status
- Size of home or rental unit

CANCER CARE
ASSURING QUALITY TO IMPROVE SURVIVAL
Organisation for Economic Co-operation and Development

Cancer Care: Assuring Quality to Improve Survival surveys the policy trends in cancer care over recent years and looks at survival rates to identify why some countries are doing better than others. It sets out what governments should do to reduce the burden of cancer in their countries. As well as an adequate level of resourcing, a comprehensive national cancer control plan appears critical, emphasizing initiatives such as early detection and fast-track treatment pathways. Countries also need better data, particularly for patients' experiences of care, in order to provide high quality, continuously improving cancer care.

HEALTH AT A GLANCE 2013
OECD INDICATORS
Organisation for Economic Co-operation and Development

This seventh edition of Health at a Glance provides the latest comparable data on different aspects of the performance of health systems in OECD countries. It provides striking evidence of large variations across countries in the costs, activities and results of health systems. Key indicators provide information on health status, the determinants of health, health care activities, and health expenditure and financing in OECD countries. Each indicator in the book is presented in a user-friendly format, consisting of charts illustrating variations across countries and over time, brief descriptive analyses highlighting the major findings conveyed by the data, and a methodological box on the definition of the indicator and any limitations in data comparability.

World Health Organization

The International Classification of Diseases for Oncology (ICD-O) has been used for nearly 25 years as the standard tool for coding diagnoses of neoplasms in tumour and cancer registrars and in pathology laboratories. In preparing this revised edition, the editors have made a special effort to change as few terms as possible, to add new terms at empty spaces, and to avoid reuse of previously assigned codes. While all topography codes remain the same as in the previous edition, morphology codes have been thoroughly reviewed and, where necessary, revised to increase their diagnostic precision and prognostic value.

RISKING YOUR HEALTH
CAUSES, CONSEQUENCES, AND INTERVENTIONS TO PREVENT RISKY BEHAVIORS
The World Bank

Individual choices are an important part of the risky behaviors. Risking Your Health: Causes, Consequences, and Interventions to Prevent Risky Behaviors explores how those choices are formed and what are their consequences? Why do people engage in risky behaviors? Many different explanations have been proposed by psychology, sociology, economics or public health. One trait common to all these behaviors is that there is a disconnect - a function of both delay and uncertainty - between the pleasure or satisfaction provided by them and their consequences.

9780821399064 • $25.95 • Paperback
Over the last 20 years, PET (positron emission tomography) and PET/CT (positron emission tomography/computed tomography) have revolutionized the care of cancer patients. It is one of the fields in medical imaging with the highest growth rate. Proper cancer management requires highly accurate imaging in order to select the correct treatment that applies to the individual patient. The ability to provide, in a single imaging session, detailed anatomical and metabolic/functional information, has established PET/CT as an indispensable imaging procedure in the management of many types of cancer. The reliability of the images acquired on a PET/CT scanner depends on the quality of the imaging technique. This publication addresses an important aspect of PET/CT imaging, namely how to perform the 18F-FDG PET/CT scan in an adult patient with cancer.
ARCHIMATE 2 CERTIFICATION STUDY GUIDE
Van Haren Publishing

This title is a Study Guide preparing for the ArchiMate 2 Part 1 and 2 Examinations. It is excellent material for:

- Individuals who require a basic understanding of the ArchiMate modeling language;
- Professionals who are working in roles associated with an architecture project and who need to understand architecture artifacts developed using the ArchiMate modelling language;
- Individuals who want to achieve a recognized qualification to demonstrate their knowledge of the ArchiMate modelling language.

GOVERNANCE OF ENTERPRISE IT BASED ON COBIT 5
A MANAGEMENT GUIDE
IT Governance Publishing

Written for IT service managers, consultants and other practitioners in IT governance, risk and compliance, this practical book discusses all the key concepts of COBIT®5 (Control Objectives for Information and related Technology), and explains how to direct the governance of enterprise IT (GEIT) using the COBIT®5 framework. The book also covers the main frameworks and standards supporting GEIT, discusses the ideas of enterprise and governance, and shows the path from corporate governance to the governance of enterprise IT.

Drawing on more than 30 years of experience in the IT sector, the author explains crucial concepts, including:

- the key elements of COBIT®5, the 5 principles, 7 enablers and the goals cascade
- the structure of the 37 COBIT®5 processes
- the implementation of GEIT using COBIT®5 and an implementation lifecycle

For those studying for the COBIT®5 qualifications, Governance of Enterprise IT based on COBIT®5 covers all the material needed for the COBIT®5 Foundation course, making it invaluable to anyone planning to take the exam.

INFORMATION ECONOMY REPORT 2013
THE CLOUD ECONOMY AND DEVELOPING COUNTRIES
United Nations

The Information Economy Report 2013 contributes a nuanced appraisal of the potential role and value of cloud computing in developing and transition economies. It does so by looking at three main areas: current status of the cloud economy in developing countries, potential impacts and, building on these, elaborates on policy and regulatory approaches to facilitate adoption and use of the cloud and to maximize gains from it. This is the first time a United Nations Secretariat report examines the implications of cloud computing for developing countries.

Pragmatic Application of Service Management
The Five Anchor Approach
IT Governance Publishing

Written by service management gurus Suzanne D. Van Hove and Mark Thomas, Pragmatic Application of Service Management is the first book to provide guidance on creating an integrated system based on the three leading service management approaches: COBIT®, ISO/IEC 20000 and ITIL, and to provide a unique mapping to assist service management practitioners in their information gathering. This practical book presents a holistic view of the three and enables service managers to immediately adapt and deploy the guidance, quickly improving their ITSM function.

Packed with instructive illustrations and helpful tables, this book is ideal for service managers, consultants, auditors and anyone who is considering adopting, adapting or merging COBIT®, ISO/IEC 20000 and ITIL. Through mini-case studies, the authors apply their unique Five Anchor Approach to demonstrate how the improvement aspects of COBIT®, ISO/IEC 20000 and ITIL can help identify and deal with common problems faced by today’s organizations. Read this book to learn how to merge COBIT®, ISO/IEC 20000 and ITIL for better service management.

**INTERNATIONAL RELATIONS OF ASIA**  
Second edition  
Rowman & Littlefield Publishers  
As the world’s most dynamic region, Asia embodies explosive economic growth, diverse political systems, vibrant societies, modernizing militaries, cutting-edge technologies, rich cultural traditions amid globalization, and strategic competition among major powers. As a result, international relations in Asia are evolving rapidly. In this fully updated and expanded volume, leading scholars from Asia, Europe, and North America offer the most current and definitive analysis available of Asia’s regional relationships. They set developments in Asia in theoretical context, assess the role of leading external and regional powers, and consider the importance of subregional actors and linkages. Combining interpretive richness and factual depth, their essays provide an authoritative and stimulating overview. Students of contemporary Asian affairs—new to the field and old hands alike—will find this book an invaluable read.

STILL OURS TO LEAD
AMERICA, RISING POWERS, AND THE TENSION BETWEEN RIVALRY AND RESTRAINT
Brooks Institution Press

Is the United States still a “superpower”? How are the rising powers establishing themselves in international politics and security? What is the future of global stability? Still Ours to Lead tells a nuanced story of American leadership and artfully examines the tension between the impulse to rival the United States and the incentives for restraint and cooperation among the rising powers. That balance of rivalry and restraint provides the United States with a continued ability to solve problems and to manage crises at roughly the same rate as when American dominance was unquestioned.

DIFFERENT ASPECTS OF ISLAMIC CULTURE
Vol. 1: Foundations of Islam
United Nations Education, Scientific and Cultural Organization

Islamic culture, which is still vigorous in spite of its great antiquity, set out to develop side by side a vision of the individual and of the universe, a philosophy and an art of living that can be seen in the impressive remains of its heritage that is an essential part of the whole of mankind’s. Halted for a time by adverse historical conditions, this culture none the less found the strength within itself to re-emerge. Its fidelity to its roots does not prevent it from keeping up with the times and participating in contemporary forums and the stirring dialogue of cultures.

This series of volumes on the manifold facets of Islamic culture is intended to acquaint a very wide public with such matters as: the theological bases of the faith and principles that constitute the bedrock of the overall structure; the status of the individual and of society in the Islamic world; the expansion of Islam since the Revelation: the Arab, Asian, African and European spheres espousing the new faith and the way in which the rights of converted peoples have been upheld; the vital contribution of Islamic civilization to the adventure of human knowledge in science and technology; the educational and cultural manifestations of Islamic civilization in literature, the visual arts and architecture; finally, Islam today between loyalty to its past and the inescapable conquest of modernity.

HOW REAL IS RACE?
A Sourcebook on Race, Culture, and Biology - 2nd Edition
Rowman & Littlefield Publishers

How real is race? What is biological fact, what is fiction, and where does culture enter? What do we mean by a “colorblind” or “postracial” society, or when we say that race is a “social construction”? If race is an invention, can we eliminate it? This book, now in its second edition, employs an activity-oriented approach to address these questions and engage readers in unraveling—and rethinking—the contradictory messages we so often hear about race.

The authors systematically cover the myth of race as biology and the reality of race as a cultural invention, drawing on biocultural and cross-cultural perspectives. They then extend the discussion to hot-button issues that arise in tandem with the concept of race, such as educational inequalities; slurs and racialized labels; and interracial relationships. In so doing, they shed light on the intricate, dynamic interplay among race, culture, and biology.

FORTHCOMING
**Report on the World Social Situation 2013**

*Inequality Matters*

United Nations

The 2013 report examines key drivers of inequality that have emerged in the recent past and the impact of rising inequality. It examines trends in social, economic and spatial inequalities and assesses why inequality matters in order to propose policy solutions to this persistent problem, paying particular attention to the potential role of empowerment and participation. The report highlights inequalities within and across countries and shows the cumulative, mutually-reinforcing effects these inequalities have on the systematic lack of participation and disadvantage of some social groups and on the intergenerational transmission of poverty. It discusses the role of economic and political institutions in promoting participation and empowerment.

**The Sacred Garden of Lumbini**

*Perceptions of Buddha’s Birthplace*

United Nations Education, Scientific and Cultural Organization

Lumbini, the Birthplace of the Lord Buddha, was inscribed on the World Heritage list in 1997. It is situated in an area commonly referred to as the ‘Sacred Garden’. Archaeological remains testify to the authenticity of the place, which has become a major pilgrimage site. Nevertheless over two and a half millennia, the understanding of Lumbini has changed and different perceptions exist of what Lumbini might have been like at the birth of Lord Buddha.

For the long-term safeguarding of this World Heritage site, overall understanding of the property is essential. This publication will provide a means for the various stakeholders to come to an understanding of each other’s historical, religious, environmental and touristic perspectives of Lumbini.

**INDUSTRIAL COMMODITY STATISTICS YEARBOOK 2010**

United Nations

This publication provides statistics on the production of about 600 major industrial commodities. Data was provided for the 10-year period of 2001-2010 for approximately 200 countries and territories. The commodities have been selected on the basis of their importance in world production and trade. The Yearbook is organized in two volumes, and contains correspondence tables that allow the user to link the information provided to other internationally-used product classifications.

National Accounts Statistics
Analysis of Main Aggregates 2012

United Nations

This publication is a summary of the principal national accounting aggregates based on official national accounts data for more than 200 countries and areas, covering the years from 1970 to 2012. Tables include analysis of data on gross domestic product (GDP) by different structural components, which are classified into:

1) analysis of the level of total and per capita GDP
2) analysis of the percentage shares of GDP by type of expenditure and gross value added by kind of economic activity
3) analysis of economic development expressed in terms of real growth of GDP and its components by type of expenditure and gross value added by kind of economic activity
4) analysis of price development reflected by implicit price deflators of GDP.

ProQuest Statistical Abstract of the United States 2014

The National Data Book

Bernan Press

Questions come across the reference desk on all topics: How many hate crimes were there in 2008? Are there many book clubs in the U.S.? Do you have the GDP for the U.S. for the past 10 (or so) years? How many people use Facebook? All of these questions can be answered by the ProQuest Statistical Abstract of the United States.

Published annually by the Federal Government since 1878, The Statistical Abstract of the United States is the best-known statistical reference publication in the country, and perhaps, the world. You’ll find it behind nearly every reference desk in U.S. libraries as the authoritative go-to source. Librarians value the Statistical Abstract as both an answer book and a guide to statistical sources. As a carefully selected collection of statistics on the social, political, and economic conditions of the United States, it is a snapshot of America and its people.

Revenue Statistics 2013
1965-2012

Organisation for Economic Cooperation and Development

Data on government sector receipts and on taxes in particular, are basic inputs to most structural economic descriptions and economic analyses and are increasingly used in international comparisons. This annual publication presents a unique set of detailed and internationally comparable tax data in a common format for all OECD countries from 1965 onwards. It also gives a conceptual framework to define which government receipts should be regarded as taxes and to classify different types of taxes.

Review of Maritime Transport 2013

United Nations

The Review is the renowned United Nations source containing a wealth of unique statistics and analysis on seaborne trade, the world fleet, freight costs, port traffic and the latest trends in the legal and regulatory environment for international maritime transport. This year’s Review includes the 10 year time series of unique data on liner shipping connectivity. Underlining recent research that suggests that containerization had a stronger impact on driving globalization than trade liberalization, the Review discusses global developments in containership deployment, and then looks at trends of liner shipping connectivity in Latin America, Africa and Asia.

**Statistical Yearbook 2011**

**56th Issue**

United Nations

The Statistical Yearbook is an annual compilation of a wide range of international economic, social and environmental statistics on over 200 countries and areas, compiled from sources including UN agencies and other international, national and specialized organizations. The 56th edition contains data available to the Statistics Division as of 31 December 2012 and presents them in 65 tables on topics such as: agriculture, forestry and fishing; communication; development assistance; education; energy; environment; finance; gender; international merchandise trade; international tourism; labor force; manufacturing; national accounts; population; prices; and science and technology. The number of years of data shown in the tables varies from one to ten, with most tables covering the period up to 2010 or 2011. Accompanying the tables are technical notes providing brief descriptions of major statistical concepts, definitions and classifications.

**Vital Statistics of the United States 2014**

**Births, Life Expectancy, Deaths, and Selected Health Data**

**Sixth Edition**

Bernan Press

Vital Statistics of The United States brings together a comprehensive collection of birth, mortality, and health data into a single volume. It provides a wealth of information compiled by the National Center for Health Statistics and other government agencies.

This edition contains updated tables which provide a more comprehensive look at births, mortality, health, and marriage and divorce.

New to sixth edition of Vital Statistics:

A new chapter provides statistics on marriage and divorce from the Centers for Disease Control and Prevention and the U.S. Census Bureau. The new information includes rates for marriages and divorces, marital statuses for adults 18 years of age and over, median age at first marriage, median durations of current marriages, and statistics on marriages ending in widowhood and separation.

EXPORTERS
THE WIT AND WISDOM OF SMALL BUSINESSPEOPLE WHO SELL GLOBALLY
U.S. Department of Commerce

The U.S. is the world’s largest exporter of products and services, but a comparatively small percentage of businesses actually do it. The business owners that export find it lucrative, educational and endlessly fascinating as their work brings them into close contact with people and cultures worldwide. This book profiles 25 Americans who battled competitors, fear of the unknown, and personal adversity to build successful small businesses in the global marketplace. Alternately humorous, amazing and inspirational, their stories also serve as valuable advice for readers wanting to follow their example.

**Trade and Development Report, 2013**  
*Adjusting to the Changing Dynamics of the World Economy*  
*United Nations*

The shape of the world economy has changed significantly over the last two decades, with a rising importance of several developing countries and regions as additional drivers of global economic growth. The main objective of Trade and Development Report 2013 is to assess the systemic changes in the underlying structure of the world economy and to analyze the resulting policy challenges. Particular attention will be paid to a plausible scenario in which developing and transition countries must design their development strategies in a context of a prolonged period of sluggish growth in developed countries. The Report’s main message will be that in order to achieve high, sustained and inclusive growth, developing and transition economies will need to move towards a new form of development, away from seeking net-export advantages on the back of global imbalances. Rather, the new context calls for strengthening domestic income and demand and reinvigorating regional and South-South coordination and economic linkages.

**Trade Policy Review 2013 - Vietnam**  
*World Trade Organization*

Surveillance of national trade policies is a fundamentally important activity of the WTO. All WTO members are periodically reviewed, the frequency of each country’s review varying according to its share of world trade. The reviews consist of detailed chapters examining the trade policies and practices of the member and describing trade policy-making institutions and the macroeconomic situation; these chapters are preceded by the Secretariat’s Summary Observations, which summarize the report and presents the Secretariat’s perspective on the member’s trade policies. The Secretariat report and the member’s policy statement are published after the review meeting, along with the minutes of the meeting and the text of the Chairperson’s Concluding Remarks. Reports are available in English, French and Spanish.

Chinese Outbound Travel to the Middle East and North Africa
World Tourism Organization

Over the last decade, China has grown to become the first tourism source market in the world with $102 billion spent on travel abroad. While Asia and the Pacific, Europe and the Americas lead as the main destination regions for Chinese travelers, the growth in the Middle East and North Africa (MENA) region over the past decade has been impressive, yet overall flows are still modest. This study looks into Chinese travel preferences and destination choices, their perceptions of MENA countries and their travel behavior, while providing recommendations on how to market MENA destinations in the Chinese market in view of the main travel trends of China.

Domestic Tourism in Asia and the Pacific
World Tourism Organization

Domestic tourism is estimated to represent around five to six billion trips globally. This report provides an in-depth analysis of domestic tourism in 16 Asian countries highlighting its crucial contribution to the socio-economic development of one of the fastest growing tourism regions of the world. The study comprises four major components: a country profile, case studies, domestic tourism data and detailed recommendations for the development of domestic tourism. With contributions from academia, public officials and tourism professionals, this study aims to serve as practical guide for a more holistic and sustainable approach to the development of domestic tourism and a useful groundwork for further research into the topic of domestic tourism in Asia and the Pacific and in other regions.

Economic Crisis, International Tourism Decline and its Impact on the Poor
World Tourism Organization

The 2009 global economic crisis has significantly impacted international tourism, causing a decline in international tourist arrivals and international tourism revenues. This study looks into the effects of the decrease in international tourism demand on the employment, income opportunities and the livelihood of poor and vulnerable groups, as well as on the capacity of households to cope with such shocks. The report combines a comparative large-N macro-economic analysis with case studies on the Maldives, Costa Rica and Tanzania.

The IMF E-Library provides comprehensive access to IMF publications. Find in-depth, independent analysis on the financial crisis, development, macroeconomics, poverty reduction, trade, globalization, and much more. Designed to serve your management and purchasing needs, with the following benefits:

- Electronic Platform
- Enterprise Pricing
- Easy Access
- Interactive Statistical Databases
- Print Options
- Rich Archives
- Complete and Easy to Maintain
- Economical
- Searchable

**OECD iLibrary**  
Bernan.com/IGO/OECD.aspx

OECD iLibrary is the global knowledge base for OECD’s data and analysis with data going back to the early 1960s and more than 80 countries covered. It is one of the most comprehensive online resources on the world economy, society, education and environment. Content items are available in different formats and languages. With your subscription you can:

- make the content available to users at no further cost
- give users the best possible service with 24/7 unlimited concurrent access to the entire OECD collection of publications and statistics
- benefit from access via IP address recognition and/or username/password login
- benefit from perpetual access to all subscribed content and archive since 1998
- benefit for many features as MARC records and COUNTER3-compliant usage statistics

**Public Information Online**  
Bernan.com/pio/pio.aspx

Public Information Online (PIO) is the ONLY resource which allows you to view UK Parliamentary, Scottish Parliamentary and Northern Ireland Assembly papers in PDF format online. PIO is updated daily with fully searchable PDFs of ALL House of Commons, House of Lords, and Command Papers, Bills and Bill Amendments, Explanatory Notes for Bills, Standing and Public Bill Committees, and Acts and Explanatory Notes.

Why Subscribe to PIO?

- PIO is simple to use and offers you unlimited access
- Comprehensive electronic Parliamentary resource – used by all major academic libraries in the UK as well as The British Library and National Library of Scotland
- Ideal companion to House of Commons Parliamentary Papers
- Updated on the day of publication
- Notified as soon as a document is available
The United Nations eCollection is a research tool containing all current publications of the United Nations, including books, reports, journals and working papers. With over 2000 titles available at launch, the UN eCollection will provide access to a unique wealth of analysis, data, research and knowledge on global affairs.

Some advanced features include:

- build your own eBook out of individual chapters taken from different titles
- comprehensive usage SUSHI and COUNTER-compliant statistics
- exportable MARC records, and CrossRef listings.
- Consortia, UN Depository Libraries, bundles with UN Comtrade and geographical discounts are available.

The e-UNWTO is a fully cross-searchable interactive database offering a vast number of high-quality World Tourism Organization (UNWTO) publications including books, journals, and statistics in their respective languages. In addition to more than 1100 books in English, French, Spanish, Russian or Arabic, the e-UNWTO also provides access to a growing number of documents which can be defined as “Gray Literature”.

The latest statistical information and aggregated data on inbound and outbound tourism are very conveniently presented within the “Tourism Factbook”.

World Bank eLibrary provides full-text and immediate access to the complete and growing collection of 9,000+ World Bank publications. Beyond its exhaustive content, eLibrary offers a variety of tools and added functionality that save users valuable time during their research. Quickly access and discover content through its intuitive interface, and many options for searching, browsing and filtering content.

Benefits for libraries and administrators:

- Free downloadable MARC records, medadata, and KBART Holdings file
- Self-service account management
- On-demand COUNTER 4-compliant usage reports
- Institutional branding
- Included in popular library search and discovery services
- Authentication via Athens and Shibboleth

To arrange a free trial or a price quote for any of these collections, contact us at info@bernan.com with your institutes’ name, address, and total FTE.

Ordering Information

Prices and Payment
Prices in this catalog are effective as of May 1, 2014. All prices are subject to change without notice.

All orders from individuals must be prepaid. We accept American Express, VISA, MasterCard, checks and money orders. Checks must be in U.S. dollars and drawn from a U.S. bank. Payment is due within 30 days of your invoice date.

Purchase orders are accepted online, by fax, email or mail. Once a valid purchase order is received our Customer Care Team will process.

Tax
CA, CO, IL, ME, MD, NY, OH, PA, TN and TX customers must pay applicable sales tax. Canadian customers should add Goods and Services Tax.

Shipping and Handling
United States: $7.00 minimum; 7% on orders totaling less than $1,000; 4% on orders totaling $1,000 to less than $5,000; 3.5% on orders totaling $5,000 or more.

Canada and Mexico: $12.00 minimum; 12% on orders totaling less than $1,000; 8% on orders totaling $1,000 to less than $5,000; 7% on orders totaling $5,000 or more.

Outside North America: $30.00 minimum; 30% on orders totaling more than $100.

Rush Orders
Rush service is available for titles in stock for an additional $20.00 per order.

Return Policy
Bernan is committed to providing exemplary service to our customers. If we have inadvertently shipped you the wrong book, if the book arrives in damaged condition, or if we have made an error in your order, we will gladly accept these returns and pay for all incurred shipping costs. Bernan will not pay shipping costs for other returns.

Customers can return any book listed in this catalog within 30 days of receipt as long as it is in saleable condition. It is the customer's responsibility to return the book via traceable means.

Bernan reserves the right to refuse any shipments damaged in transit. Please allow 45 to 60 days from receipt of your return for processing. Should you have any questions about our return policy, please contact our Customer Service Department at 1-800-865-3457.

Distribution Services
Our role as a liaison with our national and international publishers is a key ingredient in our enhanced services as a distributor. We would like to point out, however, that there are some steps in the delivery process that are beyond our control.

Delays and unclear publishing practices are not uncommon among government and intergovernmental publishers.

Volumes in a series are not always published in numerical order.

Agencies may remove titles from their sales programs without notice, or may decide not to make certain titles available as part of a comprehensive standing order package.

Account Information

Invoice Account
Invoiced orders must be received on an authorized purchase order. Please include quantity, ISBN or order number, exact title, and price. Your account number will be provided with your first invoice. Please make note of this account number as all future orders will be processed against this account number with an authorized purchase order.

Deposit Account
Deposit accounts require a minimum initial deposit of $200 and an ongoing balance of $100 to guarantee continuous fulfillment of orders. Upon receipt of payment, an account will be established and a special account number will be assigned. The cost of ordered publications will be deducted from the funds on deposit.

Standing Order Service
Standing Orders are recurring titles in a series. By placing a title on Standing Order, you are guaranteed prompt, automatic delivery of each new edition in a series as it is published. Here are just some of the services you can take advantage of with Bernan's Standing Order program:

Comprehensive Standing Order
With this service you can automatically receive all priced titles with ISBNs from a given publisher (subscriptions, co-publications, electronic products, and free publications are excluded).

Flexible Standing Order Policy
Simply notify us, and you can adjust your Standing Order account to fit your needs.

Standing Order Account Update
You can request a complete report on your Standing Order account at any time.

Duplicate Standing Order Verification
If there is any indication that you have requested a duplicate Standing Order, we will notify you immediately.

Claims
All claims must be made within 30 days of receipt of shipment.

Want to save time finding the curriculum and standards YOU NEED?

kcdlonline is a searchable database that saves you time in tracking down the latest curriculum information on a wide variety of subjects covered in PreK–12th Grade and Adult Basic Education. It provides you with direct links to the curricula you need and contact information for the agencies that issue the curriculum documents.

“KCDLonline is wonderful! ...This product fills a real need.”
–Gary Lare, Ph.D., Head, Curriculum Resources Center, University of Cincinnati

“KCDLonline offers easy access to curriculum documents for a reasonable fee...Recommended.”
–CHOICE

“KCDL is a tremendously useful resource for an education library.”
–The Charleston Advisor

For information on a FREE TRIAL and a price schedule, visit www.kcdlonline.com, send an email to info@kcdlonline.com, or call us toll-free at (800) 416-4374.
